1. COUNTRY HIGHLIGHTS

Nearly eight in ten respondents in Denmark consider climate change to be a 'very serious' problem (78%, EU average 74%), a 14 percentage point increase since the previous survey in 2015. Well over a quarter also see climate change as the single most serious problem facing the world (29%, EU average 12%).

Six in ten say they have personally taken action to fight climate change in the past six months (60%, EU average 49%), an increase of 7 pp since 2015. Yet when given specific examples this rises to 95%, suggesting many do not associate certain actions with tackling climate change.

- Respondents in Denmark are more likely than the EU average to have undertaken almost all actions covered in the survey. The most common are cutting down on consumption of disposable items when possible (72%, EU average 56%) and trying to reduce waste and regularly separating it for recycling (70%, EU average 71%).

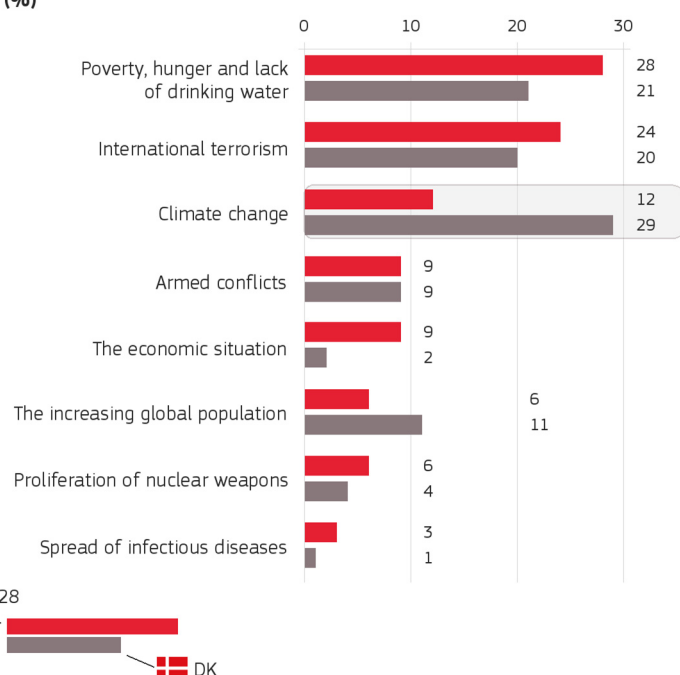

- Nearly half (47%) say that they regularly use environmentally-friendly alternatives to their private car, significantly above the EU average of 26%.

Those surveyed in Denmark are considerably more likely than the EU average to agree that fighting climate change and using energy more efficiently can boost the EU economy and jobs (86%, EU average 79%).

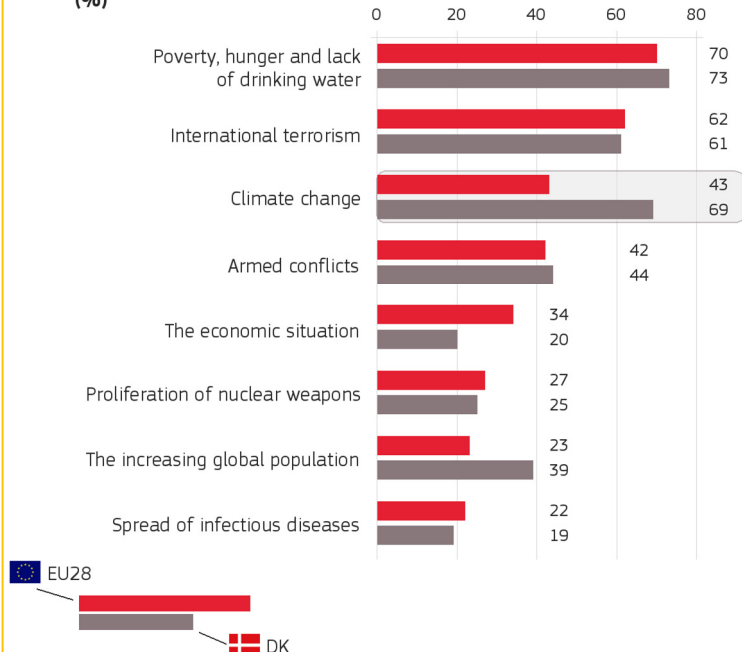

Almost all think it is important that their government sets targets to increase the amount of renewable energy used by 2030 (96%, EU average 89%) and provides support for improving energy efficiency by 2030 (96%, EU average 88%).

2. EUROPEAN PERCEPTIONS OF CLIMATE CHANGE 1/2

QC1a Which of the following do you consider to be the single most serious problem facing the world as a whole?
(%)

QC1T Which of the following do you consider to be the single most serious problem facing the world as a whole? Which others do you consider to be serious problems? (MAX. 4 ANSWERS)
