Climate Change

Greece

May - June 2015

1. COUNTRY HIGHLIGHTS

Close to nine in ten respondents in Greece think climate change is a “very serious” problem (87%, well above the EU average of 69%). Around six in ten say national governments are responsible for tackling climate change in the EU, the highest score in any Member State (61%, compared with the EU average of 42%).

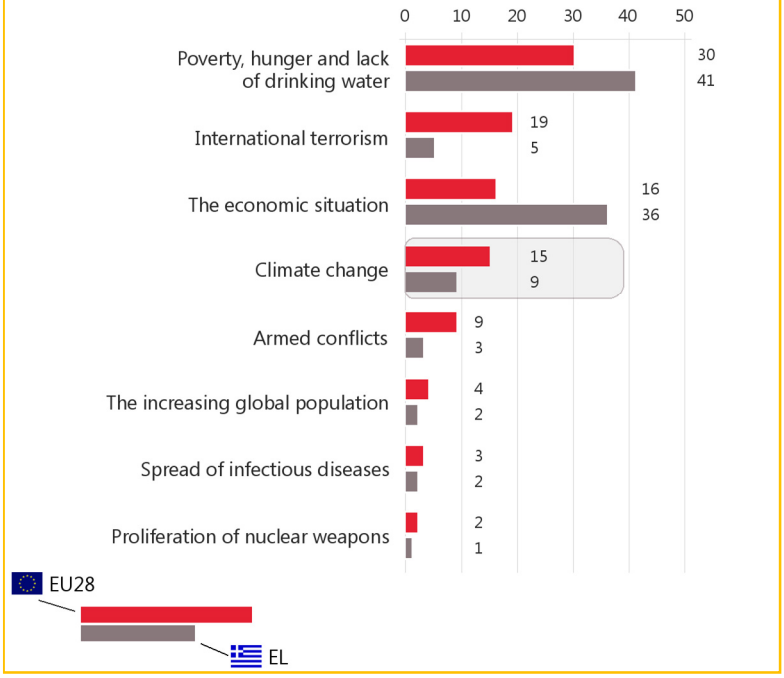
Four respondents in ten say they have personally taken some action to fight climate change in the past six months. However, when shown a list of practical measures, this figure rises to 89%, suggesting many respondents do not connect certain actions with tackling climate change. For instance, nearly half have bought locally produced and seasonal food whenever possible (47%, +12 points since 2013). Other actions include:

- Trying to reduce waste and regularly separate it for recycling (69%, +7 percentage points since 2013)
- Cutting down consumption of disposable items whenever possible (40%, +9 percentage points since 2013)

More than two-thirds of respondents think it is “very important” for their government to set targets to increase the amount of renewable energy used by 2030 (68%, EU average: 52%). An overwhelming majority (96%) agree that fighting climate change will only be effective if all countries of the world act together.

2. EUROPEAN PERCEPTIONS OF CLIMATE CHANGE 1/2

QA1a Which of the following do you consider to be the single most serious problem facing the world as a whole?
(%)



QA1T Which of the following do you consider to be the single most serious problem facing the world as a whole? Which others do you consider to be serious problems? (MAX. 4 ANSWERS)
(%)

3. EUROPEAN PERCEPTIONS OF CLIMATE CHANGE 2/2

QA2 And how serious a problem do you think climate change is at this moment? Please use a scale from 1 to 10, with '1' meaning it is "not at all a serious problem" and '10' meaning it is "an extremely serious problem".
